Winnipeg MB R2X 3C6

Outline for Level 1 Wound Care Course

Level 1 wound care teaches the use of the Wound Bed Paradigm to:

Identify risk factors for pressure injuries and to implement prevention strategies

Assess & treat wounds with & without clinical signs & symptoms of infection specifically:

- Partial thickness wounds

- Skin tears

- Stage 1 & 2 pressure injuries

Differentiate between wounds commonly seen in practice such as venous and arterial leg ulcers, diabetic foot ulcers

Report Stage 3, 4 & Unstageable pressure injuries as critical incidents

The WRHA wound care policy states that:

Health Care Professionals who have completed Level 1 wound care education or equivalent education provided by hiring facility shall:

- Initiate wound prevention strategies

- Initiate treatment for wounds with and without clinical signs and symptoms of infection including partial thickness wounds, skin tears, stage 1 and 2 pressure injuries
